

Develop Artificial Intelligence knowledge
and skills to support the Circular
Transition of agri-food sector

Dr. Alkmini Gavriil
Project Manager - SEVT

Co-funded by
the European Union

AISkills4 CircularTransition

Develop Artificial Intelligence knowledge and skills to support the Circular Transition of agri-food sector

Project General Information:

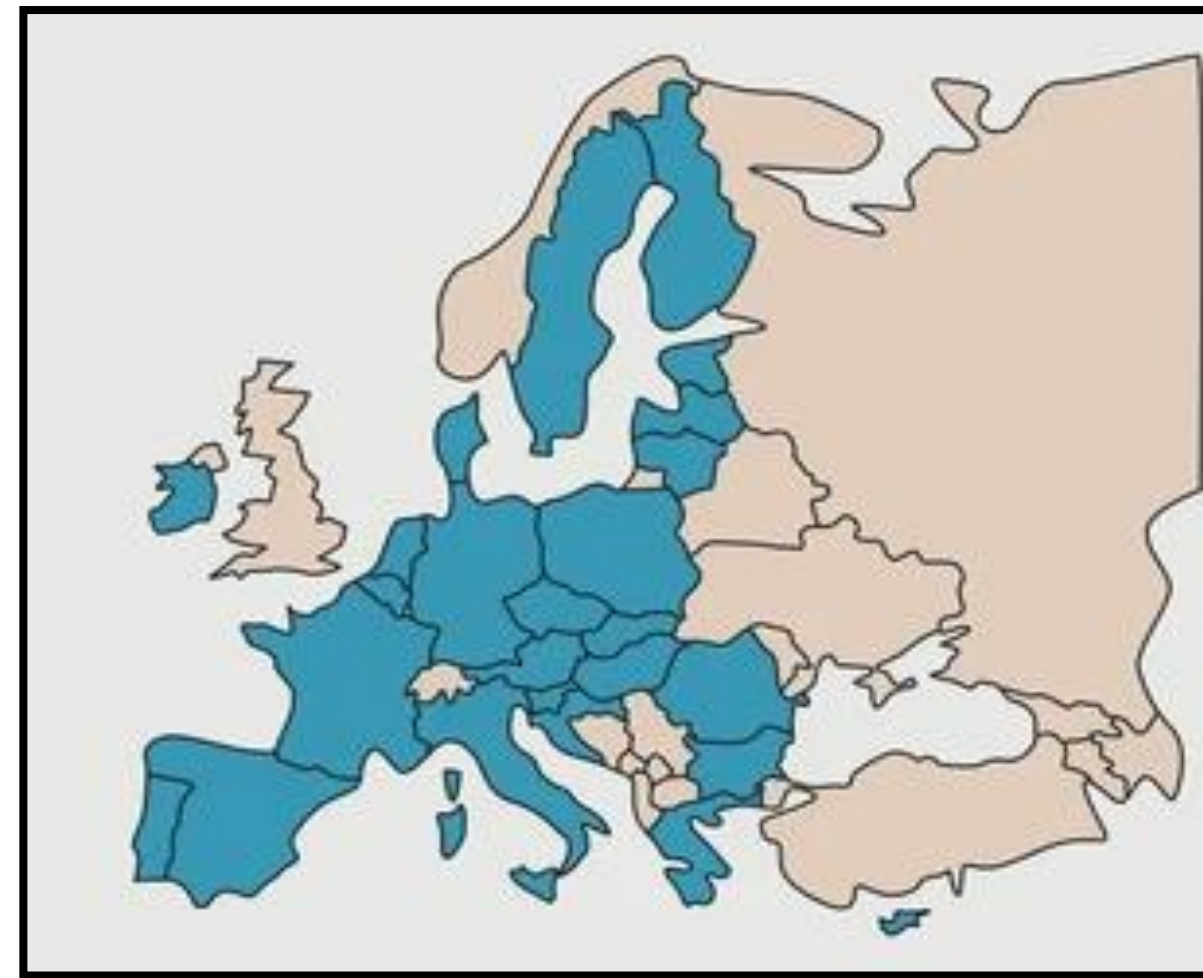

Co-funded by Erasmus⁺ program

Partners

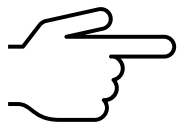

- 6 partners
- 5 EU countries

Period

36 months
(11/21 – 10/24)

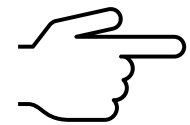

Project Partners:

 *3 national food industry associations*

Greece

FUNDACIÓN **equipo humano**

Spain

Cyprus

Fundación Equipo Humano (FEH):

Non- profit organization specialized in HR consultancy field:

- ✓Vast experience in EU funded projects and developing tailored training programmes.
- ✓Unlock HR potential to enhance sustainability and overall performance in a company.
- ✓In charge of Module III: Circular Human Resources Management.

Euranova:

SME for solutions to current and future ICT challenges

- ✓Private research center funded by consultancy services specializing in Data Science and Data Engineering.
- ✓Euranova has led the Project Result (PR1) which focuses on Pedagogical scenarios and methodological framework design for the training program.
- ✓Euranova has provided his expertise in Data Science and AI to craft the content of Module I and subsequent workshops

Circular Economy Alliance (CEA):

Is a research-based training provider. It offers professional education in the domain of circular economy to help accelerate the circular economy transition.

- ✓In the AISkills4CT, CEA is leading Project Result 2 (PR2) which is the development of the tailored multi-media modules on Artificial Intelligence (AI), Circular Economy (CE) and Human Resources (HR) applied to the agri-food sector and their integration into the e-platform.
- ✓CEA is providing his expertise in Circular Economy to craft the content of Module II and subsequent workshops

What is the
AISkills4CT
project?

Goals and outcomes

What is AISkills4CT project?

Aims to provide agri-food professionals with fit-for-purpose knowledge and skills on Artificial Intelligence (AI) technologies to nurture the development of fairer circular food chain models, combining the environmental, social, economic and digital dimensions.

In short, it is a European project that integrates CE and AI in the agri-food industry, for a greener, digital and resilient society and economy.

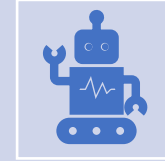

The project's **main goal** is to sensitize and train professionals from the agri-food sectors to the use of AI along the supply chains allowing a fair digital transition of their industries, with a specific focus on how AI could facilitate and help the implementation of Circular Economy (CE) principles.

Training & updating continuously the knowledge and skills of the agri-food professionals represent a crucial point and needed condition to meet the digital and circular transition goals.

Project outcomes

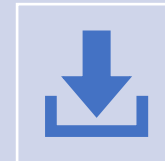

Design of pedagogical material
and methodological framework.

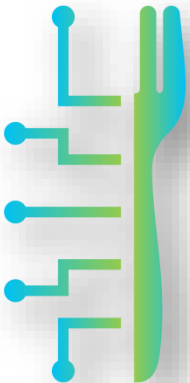

Development of **multimedia
modules** on Artificial Intelligence
and Circular Economy integrated into
the developed **e-platform**
